

From: Lyndhurst and Minstead Traffic Management Working Party – a joint venture between Minstead and Lyndhurst Parish Councils. May 2018

The Current State of Mill Lane Traffic Problems

Following various discussions over the past 23 months about the problems on Mill Lane we thought it would be useful to provide a quick summary of the current situation and actions.

Hampshire County Council Survey – Hampshire County Council (HCC) to survey traffic during the peak summer period to give details of traffic volumes, speed and vehicle length. This data to be used to determine possible further actions.

New signage on A337, A35, and moving the single-track sign in Emery Down – now these changes have been agreed HCC to implement them as soon as possible.

Single track section missing dragons teeth – HCC are aware of these and will replace them.

Single track section vegetation – Minstead Parish Council to keep this clear annually.

Dual lane section speed issues – Minstead speed watch to continue operating on this section. All data on speed and volume of traffic to be collated after the peak summer season to give a better understanding of the problem.

Further Actions – any further actions to be agreed between HCC, Minstead PC, Lyndhurst PC, and other relevant bodies towards the end of the year using data collected as above.

Minstead and Lyndhurst Parish Councils – contact details can be found via our websites:-
